

# PANEL 2

## Synchrophasor Measurements at Distribution Systems: Use Cases and Path Forward

Moderated by  
Panayiotis (Panos) Moutis, Systems Scientist, CMU, USA

**Carnegie Mellon University**  
Scott Institute  
for Energy Innovation

The 2nd IEEE International Conference on Smart Grid Synchronized Measurements and Analytics (SGSMA) *Virtual Event* | May 24-27, 2021

# Why are we here?

- Distribution System Monitoring methods & means are uncharted waters
- Utilities & distribution system operators might be lacking grid models...
- ...yet, much action at the distribution system!
- Synchronized measurements might have been a thought exercise
- We now see increased and justifiable interest
- Our panel recounts experiences, considers opportunities, draws the path forward, and seeks to attract attention & energy from the community

The 2nd IEEE International Conference on Smart Grid Synchronized Measurements and Analytics (SGSMA) *Virtual Event* | May 24-27, 2021

# Panel Outline

- Brief Presentations by Panelists
  - Sascha von Meier
  - Ken Martin
  - Paul Pabst
  - Omid Alizadeh-Mousavi
  - Greg Zweigle
- Q&A
- Open Discussion

**Please, use the chat-box or the Q&A for your questions & comments. I will collect them for our panelists & discuss them towards the end of this session!**
